

AMENDMENTS TO THE ABSTRACT

Please replace the Abstract on page 17 with the following replacement Abstract Of The Disclosure. A copy of the Abstract Of The Disclosure is attached hereto for insertion into the application.

ABSTRACT

~~Contact~~Disclosed are contact members (1)which have elastically deformable points of contact (A)(B)formed in two locations, and a main connector body (2)~~is provided for~~ insulating and holding a plurality of contact members (1)arranged at intervals in a width direction with the points of contact (A)(B)in the two locations of the respective contact members (1)being in the same positions as seen in the direction of arrangement. The main connector body (2)includes a pair of socket portions (3)for receiving board ends (10)defining land electrodes in two rows corresponding to the points of contact (A)(B)of the respective contact members (1)lying in the same positions as seen in the direction of arrangement, so that the land electrodes are in pressure contact with the corresponding points of contact(A)(B).
